SKILLS AND PROFICIENCIES

Core technologies:

- Semantic HTML
- CSS [BEM, frameworks, preprocessors]
- JavaScript [ES6+]
- TypeScript
- React [Context, Router etc.]
- Working with REST APIs
- SQL databases [PostgreSQL]
- NoSQL databases [MongoDB]
- Version control [GIT, GitHub Actions]

Familiarities:

- Cloud services [GCP, AWS]
- Docker
- Next.js
- Design [Figma, Canva]
- CMS integrations
- OOP [Java, C#]
- Software architecture [UML]
- Design principles and patterns

Other:

- Atlassian [Jira, Confluence]
- Agile management [Scrum]
- Efficient soft skills [teamwork, public speaking]

LANGUAGES

- Polish (native)
- English (C1 - both written and spoken)

EDUCATION

Degree: Master's Degree in Information Management
Major: Architecture of IT Systems
Place: PJATK Warsaw
Graduation: (finishing 07/2025)

Degree: Bachelor of Engineering in Computer Science
Major: Computer Software Engineering
Place: Warsaw School of Information Technology
Graduation: 05/2023

EXPERIENCE

Front-end Developer

Freelance contractor | 08/2023 - 03/2024

Organization management application

Taking part in development process of graphical user interface for web application, that was consisted of: calendar service, cloud-based file storage, collaboration and messaging platform, issue tracking tool and interactive AI chatbot.

Habit tracker

Contributing to mobile-first web application bridged to native iOS program by capacitor.

My tasks were mostly focused on close synergy with UI/UX designers, implementing mobile mockups with a pixel-perfect approach, conducting code review and refactoring existing solutions.

Guide website

Engineering a Single Page Application (SPA) in the capacity of an authoritative guide for a mobile application. My work was consisted of new project establishment, front-end coding, working with UI/UX designer, taking care of dependencies and reviewing code.

Full-stack Developer

HearMe & Emplomind UK | 12/2021 - 07/2023

CTO hired me to re-brand company's core application.

After successfully re-branding the application I was transferred to developing new services, modules and conducting integrations with existing solutions.

My role consisted in significant predominance of front-end tasks.

I was regularly solving business problems on my own, that required creativity and knowledge, to always try to choose the right tools and implementation method.

Using efficient time management skills I was able to spread worktime between front-end activities, writing migration scripts in PostgreSQL and executing tests in system use area.

Yet my obligation was to create technical documentation and video announcements regarding changes in our core product for clients.

I also took care of monitoring changes and resolving conflicts in various projects using GIT.

Apart from that, I assisted in developing both project management and business pipelines consistent with Scrum methodology, but also managed to regularly conclude technical training for other company departments.

Front-end Developer

Apprenticeship | 04/2021 - 11/2021

Among many other activities, my role was based on building responsive front-end interface delivered by our UI/UX designer, helping with team management, technological stack optimization, JIRA issue tracking and administrating project's repository on GitHub.

I agree to the processing of personal data provided in this document for realising the recruitment process pursuant to the Personal Data Protection Act of 10 May 2018 (Journal of Laws 2018, item 1000) and in agreement with Regulation (EU) 2016/679 of the European Parliament and of the Council of 27 April 2016 on the protection of natural persons with regard to the processing of personal data and on the free movement of such data, and repealing Directive 95/46/EC (General Data Protection Regulation).
